

## Meeting Room

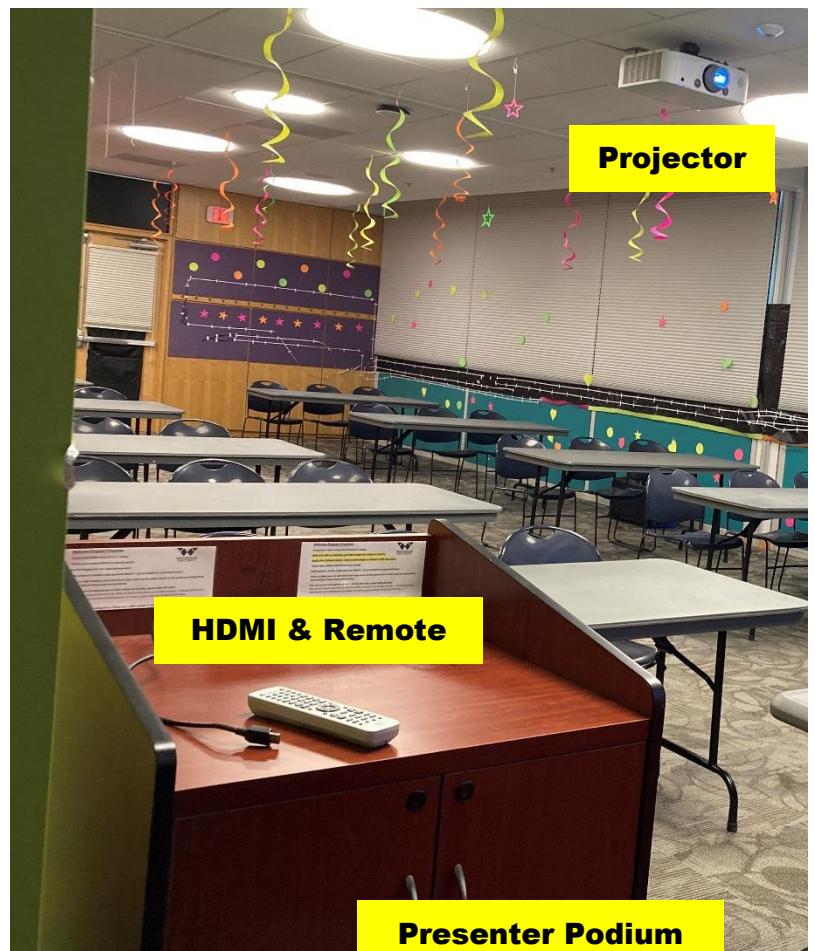

### Overhead Projector & Screen

---

As a courtesy to users of the Meeting Room, presenters are allowed to connect their own laptop to the HDMI cable connected to our ceiling mounted projector.

*If you have a MacBook and need an adapter/dongle, please ask for this at the Children's Desk.*

1. At the Presenter Podium connect your laptop to the HDMI cable.
2. Next, turn on the projector using the light gray remote control. The projector has a blue power light that will turn on.

If your laptop image does NOT project onto the big screen, you may need to change the input setting on the remote control (use the SOURCE button), or you may need to change your laptop display settings.

**Please note: we may not have staff available to help troubleshoot your technology.**
