

# Meeting Room Projector & Screen

As a courtesy to users of the Meeting Room, presenters are allowed to connect their own laptop to the HDMI cable connected to our ceiling mounted projector.

*If you have a MacBook and need an adapter/dongle, please request one at the Children's Desk.*

1. At the Presenter Podium, **connect your laptop to the HDMI cable**.
2. Next, **turn on the projector** using the white EPSON remote control. *The projector has a blue power light that will turn on.*

## Troubleshooting

- Problem: *Laptop image does NOT project onto big screen*
  - Change Laptop Display Settings
  - Check that HDMI1 is selected with Source Search button on remote

**Please note: we may not have staff available to help troubleshoot your technology.**
